Summary

Postdoctoral researcher applying NLP and machine learning for data-driven electrocatalyst discovery. Creator of MATNEXUS, an open-source framework for automated literature collection, text mining, and embedding-based property prediction. Current work integrates NLP, multi-modal learning, and optimisation with experimental validation.

Education

PhD in Materials Science 2022–2025

Ruhr University Bochum (ICAMS), Germany

Thesis: *Accelerating Materials Discovery through Text Mining and Machine Learning: A Data-Driven Approach*

Supervisor: Prof. Markus Stricker ([link](#))

Master's Degree in Materials Science 2019–2022

NanChang Hangkong University, China

Thesis: *Electrocatalyst Design and Preparation: A Laboratory-Based Approach*

Bachelor's Degree in Welding Technology 2013–2017

NanChang Hangkong University, China

Research Experience

Postdoctoral Researcher, Ruhr University Bochum (ICAMS) 2025–Present

- Extending MATNEXUS with advanced NLP, multi-modal learning, and optimisation for materials discovery.
- Leading collaborations with experimental groups (incl. Prof. Alfred Ludwig's team: [link](#)) to prioritise candidate compositions and validate predictions.
- Contributing to CRC 1625 ([link](#)), DIMENSION ([link](#)), and COST CA22154 ([link](#)).

PhD Researcher, Ruhr University Bochum (ICAMS) 2022–2025

- Developed MATNEXUS: automated literature mining + word-embedding pipelines for materials discovery.
- Built Python workflows for data curation, NLP, model training/evaluation; supported composition–property prediction.
- Collaborated with experimental partners for synthesis guidance and validation.

Master's Researcher, NanChang Hangkong University 2019–2022

- Experimental electrocatalyst development (molten-salt synthesis, scale-up, electrochemical evaluation)

Conference Presentations

- 2025 – AIMSE2025 (Bochum, Germany): “Literature-Based Prediction of High-Performance Electrocatalysts.”
- 2025 – ECML PKDD (Porto, Portugal): “Iterative Corpus Refinement for Materials Property Prediction Based on Scientific Texts.”
- 2024 – MLM4MS (Ljubljana, Slovenia): “Prediction of quaternary systems based on word embeddings.”
- 2024 – MMM11 (Prague, Czech Republic): “Vector analysis for improved prediction of quaternary material systems.”
- 2024 – Early Career Researchers Day, RUB (Bochum, Germany): “MatNexus: text mining suite for materials discovery.”
- 2023 – FEMS EUROMAT (Frankfurt, Germany): “From text data to word embeddings in Materials Science.”
- 2023 – GC-MAC Summer School (KIT Karlsruhe, Germany): “MatNexus: systematic text extraction in materials science.”
- 2022 – WE-Heraeus-Seminar (Bad Honnef, Germany): “From text data to word embeddings in Materials Science.”

Fellowships, Awards, and Grants

- | | | | |
|-----------------------------------|-----------|--|-----------|
| • Research Fellowship, RUB | 2025 | • First Class Postgraduate Scholarship | 2019–2022 |
| • Doctorate with Distinction | 2025 | • Microstructure Photography (1st Prize) | 2020 |
| • CSC Scholarship | 2022–2025 | • Postgraduate Forum (1st Prize) | 2020 |
| • First Place, Science Slam (RUB) | 2024 | • National Scholarship | 2017 |
| • Excellent Graduate Student | 2022 | • NCHU Scholarship | 2013–2017 |
| • Jiangxi Gov. Scholarship | 2021 | | |

Teaching Experience

- Mentor, course project (2024): *Comparative Analysis of Descriptors in Electrocatalysis*.
- Supervisor, student assistant (2024): data collection/analysis and text-mining workflows for materials discovery.
